

This product is licensed, not sold, to You for use only under the terms of this license. The licensor (114 Consulting) reserves all rights not expressly granted to You. The Product that is subject to this license is referred to in this license as the “Licensed Application.”

a. Use of Product: Upon licensing the Licensed Application you are free to use it in your personal counseling or psychotherapy practice. This is personal software and is not intended to be used by more than one counselor or psychotherapist on a single device. The software will allow you to monitor treatment progress and therapeutic alliance with clients you are counseling. Please keep in mind that using this product in no way lessens your professional and legal responsibilities to follow all regulatory guidelines pertaining to your work.

b. Protection of Health Information: If you store Patient Health Information (PHI) with this software you may be required to comply with HIPAA and HITECH federal regulations if you are in the United States of America, or similar privacy regulations in other countries. As with any PHI it is entirely your responsibility to comply with regulations. By using this app you agree to release 114 Consulting from any and all liability.

At a minimum you should follow these steps for protecting health information: 1) Turn on the password lock for your device. This is done in the Settings > General pane. Once the password lock is on, all data generated from this software and stored on your device is automatically encrypted. Note that there is a separate password to access the software. You should set different passwords to unlock the device and access the software. 2) Turn off the iCloud Backup option for your device. This is set in the Settings > iCloud > Storage and Backup pane. At this time iCloud is not optimal for those seeking compliance with HIPAA and HITECH requirements in the United States of America. 3) Backup your client/patient data regularly using iTunes. Connect your device to your computer, select the device on the iTunes device pane, and choose the encrypted backup option. This will allow you to restore client/patient data to your device should you have to restore it to factory settings or if you replace your device. 4) If you use the email feature of this software, you should turn on S/MIME protection for your email account. This is accomplished in the Advanced tab of the Accounts settings on your device. Nothing in this paragraph is to be deemed formal legal advice.

c. Norm Development: By using this product you are agreeing to be asked about sharing de-identified response data for purposes of scale development and enhancement. You may choose not to participate. If you choose to participate in the normative data collection, information from your clients/patients will be sent via email to a repository where data are being collected from around the world. No identifying information about you or your clients/patients will be included in the data packet that is sent with your email.

d. Reproduction of Scales: The Licensed Application contains a progress and alliance scale used by permission of the copyright holder(s). Reproduction or reuse of these scales apart from this software is prohibited.

e. Scope of License: The license granted to You for the Licensed Application is a non-transferable license allowing You to use the Licensed Application on any iPhone or iPod touch that You own or control, as permitted by the Usage Rules set forth in the App Store Terms of Service
